

Introducing The World's Most Advanced Trash Bin Cleaning & Power-Washing Systems

BREAKING NEWS! WE RECEIVED EGLE APPROVAL FOR OUR 17-STAGE WASTEWATER RECYCLING & FILTRATION SYSTEMS!

Eliminates the need to dump your wastewater throughout the day. Adds 3 hours of cleaning time.

Titanium Trash Bin Cleaning Truck (Equipment & Upper Body)

19,500 Lbs GVWR Flatbed Truck Sold Separately (We can provide the truck)

- Can Clean 500 Extremely Filthy Trash Bins in One day!
- 17-Stage Waste Water Filtration and Recycling Systems. Burns off 90% of the **Hazardous Wastewater** Generated By Trash Bin Cleaning.
- Huge 3500 PSI @ 9 GPM Hot Water Pressure Washer 37 HP (70% More HP)
- Dual Bin Grabber Style Hydraulic Lifter
- Dual 4 Nozzle High Pressure Stainless Steel 3000 PSI Cleaning Heads (Best)
- Dual 270 Gallon Tanks 1 supply & Wastewater Holding Tank 540 Gallon Total
- Includes Upper Truck Body with 6 Swing-Out Doors
- Retractable Hose Reel with 50' Hose & Gun.
- Complete 12-Volt Chemical Sprayer With 25 Gallon Tank & 50' Hose & Reel.

Optional upgrades and accessories

- Optional: Electric Hose Reels & 100' Inlet Hose & 200' Pressure Hose
- Optional: 20", 24", 30" 36" 48" & 60" High Speed Surface Cleaners.
- Optional: Soft Wash Chemical Sprayer, 55 Gal Tank & 200' Hose & Elect. Reel.
- Optional: Diesel Powered Hot Water Pressure Washer Option
- Optional: Sign Package and Additional Marketing Items

Diamond Trash Bin Cleaning Truck (Equipment & Upper Body)

25,995 Lbs GVWR Flatbed Truck Sold Separately (We can provide the truck)

- Cleans 500 Extremely Filthy Trash Bins in an 8 Hour day!
- EPA Approved 17-Stage Waste Water Filtration and Recycling Systems. Burns off 90% of the **Hazardous Wastewater** Generated By Trash Bin Cleaning.
- Huge 3500 PSI @ 9.5 GPM Hot Water Pressure Washer 37 HP (70% More HP)
- Dual Bin Grabber Style Hydraulic Lifter.
- Dual 4 Nozzle High Pressure Stainless Steel 3000 PSI Cleaning Heads (Best)
- Dual 400 Gallon Tanks 1 supply 1 Wastewater Holding Tank 800 Total.
- Retractable Hose Reel with 50' Hose & Gun.
- Includes Upper Truck Body with 10 Swing-Out Doors
- 500 gallons of EPA approved Sanitizer & Disinfectant with Purchase.
- Complete 12 Volt Chemical Sprayer With 25 Gallon Tank & 33' Hose. See optional accessories listed below & vehicle wrap below.

TRASH BIN CLEANERS DIRECT WORLD'S LARGEST TRASH BIN CLEANER MANUFACTURING FACILITY

NO HOPPER HAULING

Unlike Our Competitor We Do Not Use The Trash Bin Hopper as a Wastewater Holding Tank Since That is Not a legal Way Hazardous Wastewater in any City or State in the USA. You also have the option to provide your own truck as long as it meets our specifications

BREAKING NEWS! WE RECEIVED EPA APPROVAL FOR OUR 17-STAGE WASTEWATER RECYCLING & FILTRATION SYSTEMS!
 Eliminates the need to dump your wastewater throughout the day. Adds 3 hours of cleaning time.

Titanium Series Trailer Package (Best Seller)

- Can Clean 500 Extremely Filthy Trash Bins in One day!
- 17-Stage Waste Water Filtration and Recycling Systems. Burns off 90% of the **Hazardous Wastewater** Generated By Trash Bin Cleaning.
- Huge 3500 PSI @ 9 GPM 37 HP Hot Water Pressure Washer(70% More HP)
- Dual Bin Grabber Style Hydraulic Lifter
- Dual 4 Nozzle High Pressure Stainless Steel Cleaning Heads (Best)
- Dual 270 Gallon Tanks 1 supply & Wastewater Holding Tank 540 Gallon Total
- Super Duty Trailer Package 4-Swing-Out Doors. (Wet weight 9,800 Lbs.).
- Hose Reels with 200' High-Pressure and 100' Inlet hose.
- Complete 12-Volt Chemical Sprayer With 25 Gallon Tank & 50' Hose & Reel.
- Optional: Electric Hose Reels & 100' Inlet Hose & 200' Pressure Hose
- Optional: 8", 12", 20", 24", 30" 36" 48" & 60" High Speed Surface Cleaners.
- Optional: Soft Wash Chemical Sprayer, 55 Gal Tank & 200' Elect. Reel.

Marketing Assistance Programs (MAP)

TBCD has exactly what your new business needs to get it moving in the right direction and gives your business the best route to success.

Optional Route Management Software 6 in 1.

1. Route Management, 2. Route Optimization, 3. Links to Accounting Systems 4. Stores & Processes Credit Cards 5. Send emails 6. Send Single or Bulk Text Messages & More.

Think about trying to manage over a thousand customers with different locations, and different days and pick-up times without it.

Optional Brand Building & Marketing:

Our experts will build you a professional website.

We give you access to a team of amazing graphic artists & designers that can help build your brand. Have us design the perfect logo, wrap your truck and or trailer. Design business cards, fliers, door hangers. We can also provide you with custom shirts, hats, uniforms and other promotional items.

Free consulting services

There are over 350,000 homeowner associations in the United States. Over 40 million households with over 50% of the owner occupied households in the America. It also represents millions of volunteers that serve on homeowner association boards and committees. This is important since approximately 70% of all homeowner associations are completely managed by volunteers. TBCD can teach you how to access those data bases in your area.

We help build your business.

We have helped multiple clients of ours win huge trash bin cleaning contracts with local counties, cities and waste companies across the country. We offer our clients free consulting services and can teach you how to approach waste companies and municipalities, set a demos and lock in bid specs that no other systems can meet. Waste companies and public sanitation departments are classified under environmental companies or departments. The best way to gain their trust is to actually own the most environmentally friendly system in the area. We offer systems with up to 17-stage recycling systems that filter wastewater down to 5 microns and filter out oils and phosphates. Note: Extremely high levels of cooking oils, grease, phosphates from fertilizer and other hazardous materials are found in wastewater after cleaning as little as a dozen trash bins.

Learn more by contacting the experts at Trash Bin Cleaners Direct, LLC. 616-250-4039
info@trashbincleanersdirect.com www.trashbincleanersdirect.com

THIS IS WHAT UNFILTERED WASTEWATER IN A HOPPER LOOKS LIKE

**LIQUID INDUSTRIAL WASTEWATER
 LIQUID INDUSTRIAL BI-PRODUCT**

**OBVIOUSLY
 THIS IS NOT
 NOT GREYWATER**

**NOT LEGAL TO DUMP
 IN SELF SERVICE
 CAR WASH BAYS**

**NOT LEGAL TO
 DRIVE AROUND IN
 AN OPEN TOP TANK
 \$8,000.00 FINE**

NOT LEGAL TO DUMP AT RV DUMP SITE

Is the trucks your considering buying street legal ?

Other Manufactures actually use 200-gallon to 625-gallon open top trash bin hoppers as wastewater holding tanks. It is 100% illegal to transport wastewater in an open top containers. A company in NJ was fined \$13,000.00 for not securing their cargo & illegally draining his tank in a R.V. drain at a truck stop.

Wastewater containing cooking oil, grease, phosphates from fertilizers, pesticides that spill out of the hopper onto the ground while taking turns or while going over speed bumps will get you a ticket every time. This ridiculous practice is used by other trash bin cleaning equipment manufactures to cut costs. Waste companies will not hire companies if they find out that they are dealing with non-street legal vehicles . Contact your local Department of Transportation (DOT) for additional information.

Cargo weight issues & concerns: Is it street legal?

Police, State Troopers & DOT inspectors normally classify all water tanks and wastewater holding tanks on vehicles as being full, especially after an injury accident. See example below of what to stay away from.

For example: if you look at other systems that use a 525-gallon wastewater tank & 525-gallon fresh water tanks that adds up to 1,050 gallons of total water capacity. Clean water weighs 8.34 lbs. per gallon 1,050 gallons multiplied 8.34 lbs. per gallon equals 8,875 lbs (4.5 tons. Now you must add the weight of the truck, truck body, pressure washer, fuel, hydraulic lifter system, trash bin hopper & employees.

Take that total and compare it to the trucks or trailers GVWR Gross Vehicle Weight Rating. Overloaded vehicles can cause instant brake failures & can void drive-train warranties. Insurance companies may cancel your policy leaving you liable for all damages. This truck needs to be at minimum of 19,500 lbs GVWR but I have seen others so called manufactures mount this on equipment onto 14,500lbs trucks truck. These are vehicles are grossly overloaded with hundreds even a thousands of pounds over the GVWR. [Trash Bin Cleaners Direct LLC.](http://www.trashbincleanersdirect.com) only builds street legal vehicles.

That is why Hydro-Chem Systems mandates that all truck mounted systems that we build our at least 19,500 lbs. rated trucks. Our new Diamond package requires a truck rated 25,900 lb. GVRW. Do not let anyone tell you otherwise. Contact your local DOT for the facts. This can save lives and extend the vehicles life.

Why cleaning speeds are so important.

This is why cleaning speeds & wastewater recycling systems is so valuable. The faster you clean the less water you use. Our systems can clean up to 20 faster then other systems using a faction of the water.

Dirty Trash Carts Can Pose Major Health Risks!

TBCD's system heats the water up to 200°F to sanitize the trash bins and help eliminate up to 99.9% of harmful organisms like E. Coli, Salmonella, Baylisascaris & Listeria, Leptospirosis.

Bacteria is commonly transferred by rats & raccoon urine. People & pets can get infected when it comes in contact with their skin, or gets into their nose, mouth, throat, or eyes, or if swallowed. Dogs are especially at risk and may die from the disease. Dirty trash cans attract cockroaches, maggots, mice, rats, possums, raccoons, bears, and other pests that can bring all kinds of health hazards to your home.

Roundworm ("Baylisascaris") is found in infected raccoons, and the eggs are passed through the feces. Symptoms may include tiredness, lack of coordination, and loss control, blindness, and coma. It's common knowledge that you always clean dirty dishes in hot water because it loosens caked-on food and grease. So why would anyone consider cleaning trash carts with cold water?

Trash Bin Cleaners Directs ultra-high-volume hot water cleaning system makes all the difference in the world.

RODENTS WILL CHEW THROUGH HARD THICK PLASTIC TRASH BINS FOR MEAL

**No Franchise Fees or Restrictions !
Financing is Available!**

1. World fastest cleaning speeds! Clean light to medium soiled trash bins, in an average of 5 to 8 seconds with less than 1-gallon of water. Conserves up to 40 gallons of water per trash bin or 80 gallons per stop.
2. Clean the filthiest starter trash cans "First Time Cleaning" in an average of 30 seconds! Unlike other systems that take an average of 4 to 12 Minutes to clean 1 cart. Saving you an average of 40 gallon of water per cart.
3. Clean-up to 525 trash bins per day. Realltime video shows 32 carts cleaned at a waste company in under 30 minutes thats 64 per hour video https://www.trashbincleanersdirect.com/
4. Recycle wastewater while burning off up to 90% of the hazardous wastewater reducing downtime while protecting the environment. See Palm Beach County Septic Policy (RV Parks) PDF Attached
5. TBCD exclusive 17-stage wastewater filtration & Hydro-Clear recycling allows you to double and triple the amount of trash bins that you can clean in a day, Starting with three 1,000 micron easy clean filters, Oil absorbers & 4 solid separation tanks. Multiple washable filters filter wastewater down to 5 microns (Inexpensive and easy to maintain). <i>(Some competitors add an inexpensive shop wet vacuum and call it a recovery system)</i>
6. TBCD 3-stage wastewater recycling System with Hydrocarbon, Oil, Fuel, Phosphate, Chlorides & Odor control filters total 18-total stages. Included with our Titanium & Diamond packages. Avail. on all models.
7. High-Speed Stainless Steel 4 jet Cleaning Heads (Best in Class). Not cheaper quality aluminum heads models and or 2 & 3 nozzle ss models. (We have never needed to replace a worn our head yet).
8. 100% Chemical Free Trash Cart Cleaning. We use high-temperature hot water and 31,500 Cleaning Units (CU's) on our Titanium models. Bio-degradable cleaners can be highly toxic to aquatic life and can make disposal of your wastewater very expensive
9. True Heat High-Efficiency diesel-fired 600,000 Btu heaters, can save you up to \$1,600.00 per month on diesel fuel, compared to other pressure washers on the market.
10. We offer only Street Legal trucks and trailers. We do not use an open-top trash bin hopper to hold unfiltered wastewater & garbage. It's illegal to transport wastewater in an open-top trash bin hopper. Check with your local EPA first. Do your due diligence and make sure you do not invest in a non-street legal vehicle.
11. Street Legal Vehicles: Proper GVWR Gross Vehicle Weight when full. (Warning not all MFG are DOT Compliant some have GVWR that can be 2,000 lbs. overloaded) Investing in an improper engineered system can cost you your life, your business, endanger the public and damage your vehicles! (It's insane to have up to 5,000 lbs. of weight hanging off the rear of a truck or trailer. See why https://youtu.be/fWd8ml9mFMo
12. Trash Bin Cleaners Direct, LLC.177-page marketing and contractor training guide, written by Dan Swede is
13. Logo and design and full truck and trailer sign wraps are available.
14. Optional 6 in 1 Route management software that can store a customer's credit card, provide invoicing, and has optional text messaging, email invoice and marketing capabilities. This system can also be linked to separate accounting software and credit card processing service.
15. Optional custom website no contracts. (Non-template based website, we do not make a copy of copy that ruins it for everyone's websites)
16. Multifunction System: Trash Cart & High-Speed Pressure Cleaning Systems attracts clients like waste companies, municipalities. Our systems can pressure clean concrete at up to 200 Sq. Ft per Minute. (Fastest cleaning speeds on the industry). Watch us clean a 1500 sq. ft driveway cleaned in 7 minutes. Watch one of the most amazing pressure washing videos on the internet; https://youtu.be/PLBolkQkyrE
17. Multiple accessories are available: High-Speed Surface Cleaners from 8" up to 60" wide models, Soft Wash Systems, Fleet washing packages, Wet Sandblast, Extension Wands up to 20' long, Turbo Nozzles for dumpster cleaning and graffiti removal, Muck Scuppers & more.
18. American made with the highest quality components on the market.100% financing is available with approved credit & time in business. Financing is also available for start-up companies. (USA customers only)
19. Separate 270-gallon wastewater recovery tank & supply tanks. Our newest models offer 2- 400-gallon tanks. We do not use the rear hopper as our main holding tank. See why https://youtu.be/fWd8ml9mFMo
20. Ultra-High-Volume 9 GPM @ 3500 PSI High-Temperature 31-35 HP 993cc (Not an undersized 688cc 22HP Honda powered) We deliver 60% more horse power!
21. Free hands on training covering high-speed trash can cleaning, residential & commercial pressure washing
22. We do not offer our own cart cleaning services. We do not believe in competing with clients
23. Marketing Assistance Programs (MAP)
24. No Franchise Fees or Restrictions
25. Helped over 1,000 clients start their new trash bin cleaning, pressure washing or fleet washing companies.

Dan Swede, Owner
Trash Bin Cleaners Direct
595 Jenner Drive
Allegan, Michigan 49010

Dear Dan Swede:

SUBJECT: Compliance Inspection; Trash Bin Cleaners Direct; Allegan County; Site Identification Number MID985643634; Waste Data System Number 407263

On December 12, 2022, staff of the Department of Environment, Great Lakes, and Energy (EGLE), Materials Management Division (MMD), conducted a compliance inspection of Trash Bin Cleaners Direct, located at 595 Jenner Drive, Allegan, Michigan. The purpose of the inspection was to evaluate Trash Bin Cleaners Direct's compliance with Part 111, Hazardous Waste Management, and Part 121, Liquid Industrial By-Products, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA); Subtitle C of the federal Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (July 1, 2018 edition); and any administrative rules or regulations promulgated pursuant to these acts.

Based upon information obtained and observations made during the inspection, the MMD staff determined that Trash Bin Cleaners Direct is ***in compliance*** with the requirements of Part 111 and Part 121 of the NREPA, and Subtitle C of the RCRA, that were evaluated. EGLE staff viewed fully produced trucks and trailers (units) intended for service to clean residential trash bins. The trucks and trailers appeared to be designed to capture water used to clean the insides of bins. The design of the units includes a complex multi-stage filtration system which allows the same water to be re-used multiple times for cleaning bins. This design allows the units to clean multiples of bins with out either refilling with new water or discharging used water. Any cleaning liquids or water generated on the units must be managed in accordance with Part 121, Liquid Industrial By-Products in the State of Michigan. Local sewer authorities may agree to accept any liquid wastes generated during this process. The agreement should exist in writing between the generator and the appropriate sewer authority (Publicly Operated Treatment Works).

For more information, guidance, and training on hazardous waste and liquid industrial by-products, go to the Michigan Guide to Environmental, Health, and Safety Regulations, EGLE Waste Webinar Series (michigan.gov) or EGLE Training and

About us.

World's Largest Trash Bin Cleaner Manufacturing Facility

My name is Dan Swede the owner and Founder of Trash Bin Cleaners Direct. I have helped well over one thousand (1,500) individuals start their own cleaning businesses and assisted thousands of existing companies in expanding their capabilities over the past 35 years.

We have always offered our clients sales, marketing support, and technical assistance 7-days a week 365-days a year. I have designed and built commercial pressure cleaning systems for over 35 years & have been building trash bin cleaning systems since 2010.

ASE master mechanic certified in heavy-equipment repair, diesel engines, hydraulics, and electrical systems in both heavy-truck and automotive classifications. In addition I have extensive training and certifications in wastewater recycling and filtration systems.

Trash Bin Cleaners Direct understands equipment downtime and we have made it one of my life's missions to design and build the highest quality and the most Eco-friendly, street-legal cleaning equipment in the industry. Any business owner that relies heavily upon their equipment knows, that cheap is never cheaper in the long run, and if you're going to thrive in business you need to make the best investment with equipment & a supplier you can trust.

TBCD doesn't offer systems that use the rear trash bin hopper as an open-top wastewater holding tank since it is not a street-legal way to transport wastewater in any city in the USA or providence in Canada. TBCD does not exceed a vehicle's gross vehicle weight rating GVWR just to make a sale since this can lead to life-threatening brake and suspension failures which can pose a risk of insurance companies denying claims leaving your company and you personally liable.

Why partner with us?

TBCD strive to build a new service industry here in the USA & Canada. We believe in partnerships, and long-term relationships that bring value to both businesses. At Trash Bin Cleaners Direct we put our expertise at the service of our clients and believe in providing them with the highest quality service possible. We own up our side of the partnership and are accountable for our performance and treating our client's ventures as our own. We believe in operating with honesty, integrity and transparency, and never sacrificing our values for higher profits.

We recently purchased the highly successful mobile contract cleaners division from Hydro-Chem Systems which opened its doors in 1972. I worked for HCS as their Sales Manager where I brought with me my trash bin cleaning equipment and commercial pressure cleaning systems technology and engineering, that I developed in South Florida.

TBCD offers the most environmentally friendly systems in the industry. Due to the extremely high levels of Hydrocarbons (cooking oils & grease) & Phosphates in trash bins. We added additional filtration & recycling systems stages that will separate oils, grease, and phosphates from the wastewater while filtering it down to 5 microns. Our recycling systems will also vacuum up wastewater from up to 100 ft from the vehicle allowing you to recover the wastewater from dumpster pads and storefronts, opening the door to contracts with retailers like Walmart Ect.

My personal history in the cleaning equipment and chemical sales and manufacturing started by manufacturing an extensive line of over 300 different models of commercial-grade pressure cleaners and our newly invented high-speed surface cleaning equipment X-Stream high-speed surface cleaner attachment that helps to revolutionize the pressure cleaning industry by allowing contractors to clean large areas in a fraction of the time this is back in the 1987. My partners & I secured large government contracts to sell pre-approved cleaning equipment directly to the US government. We sold to equipment rental centers and commercial cleaning contractors around the world. We had a private labeled line of pressure washers that we under the Stihl brand. My personal lifetime sales exceed 50 million dollars (\$50,000,000.00)

I pride myself on creating a YouTube channel www.youtube.com/user/dpswede featuring over 1,800 industry-related demo and training videos, filming over one thousand hours of hands-on training over the years has to give us valuable hands-on experience that we share with our customers. Our channel has over 10 million views and over 10,000 loyal subscribers. I have always believed in educating our clients and allowing them to invest in the best equipment that will meet their needs and exceed their expectations.

For new start-up companies: TBCD offers free hands-on training at our facility or online because of the recent pandemic. a 180-page contractor marketing, training & pricing guidebook, access to a 6 in 1 route management software that can be linked to an accounting system, and can store and process credit cards and send out emails and bulk text messages. Website design is included with the purchase contact us for more details. We also offer multiple marketing packages that would include logo design, truck or trailer wraps, door hanger fliers, business cards, and uniforms, anymore.
